## THE ONLY INDEX THAT OBJECTIVELY ASSESSES THE DIGITIZATION OF PHARMACEUTICAL COMPANIES

### WHAT IS THE INDEX?

An objective assessment of the investments being made in innovation to enhance the digitization of pharma. This both encourages innovation and enables companies to benchmark their innovation activities via an objective external source.

### INDEX COMPONENTS

The CNS Summit Innovation Index assesses innovation and ranks companies across three dimensions: technology advancement, trial optimization and innovative partnerships. It also factors in how the use of inventions generate tangible value that did not previously exist.
